PROFESSIONAL EXPERIENCE

Software Engineer III (Senior Frontend Engineer) • Topsoe *May 2025 – Present*

- Architect and deliver Azure-hosted enterprise web applications, including an internal Self Service Tool, with Next.js 16, React 19, TypeScript and Redux Toolkit.
- Build reusable UI component libraries aligned with the enterprise design system and optimize rendering performance via memoization, code splitting, lazy loading and RTK Query.
- Drive type-safe API integration with Python/FastAPI and PostgreSQL services; contribute to Azure DevOps CI/CD pipelines, code reviews and frontend quality standards.
- Own requirement discussions and feedback cycles with stakeholders in Denmark and China; collaborate with offshore teams across Europe and Australia in Agile/Scrum.

Associate – Projects (Frontend Developer) • Cognizant *Feb 2024 – Apr 2025*

- Developed new features for the BMW Group internal analytics dashboard using React.js, TypeScript, AG Grid and Ant Design.
- Built data-dense AG Grid views for large enterprise datasets and integrated them with GraphQL and REST APIs over MongoDB, handling async, loading and error states.
- Ensured cross-browser and cross-device compatibility; participated in Agile sprints and peer code reviews.

Implementation Web Developer • TrueBlue *Dec 2023 – Jan 2024*

- Delivered SaaS web portals from client requirements and mock-ups, resolved issues within client SLAs, and collaborated daily with the Australian R&D team.

Senior Frontend Developer • MobileCoderz *Feb 2022 – Nov 2023*

- Designed React.js frontend architectures with state management, code splitting and lazy loading; built pixel-perfect, accessible components from UI/UX designs.
- Integrated REST APIs with Axios and async/await; documented architecture and patterns, mentored junior developers and led architecture reviews.

UI Developer • Swaragh Technologies *Dec 2019 – Jan 2022*

- Built responsive, cross-browser websites and web applications using HTML5, CSS3, JavaScript, jQuery, Bootstrap and Sass, across design, development and testing.

OPEN SOURCE & PROJECTS

react-smart-copy • *React · TypeScript · npm* github.com/suprabhat02/react-smart-copy

- Author of a headless, zero-dependency React clipboard library on npm: state-machine hooks, Excel/Sheets table copy for AG Grid and TanStack Table, 100% test coverage (300+ tests), SSR-safe, WCAG 2.1 AA, ~3.2 kB core hook, automated releases with npm provenance.

Developer Portfolio & Blog • *Astro · TypeScript · i18n* suprabhat-dev.com

- Lighthouse 100/100/100/100 in production with 0.6 s LCP; native RTL i18n, JSON-LD structured data and Playwright + axe-core accessibility tests.
